GUIDELINES FOR PREPARATION OF THESES/ PROJECT REPORTS FOR MINI PROJECT
B.Tech.
FOR A.Y.2025-26

Preamble:

While utmost attention must be paid to the content of the thesis/dissertation/report. (Hereinafter called the 'thesis'), which is being submitted in partial fulfillment of the Requirements of the respective degree, it is imperative that a standard format be prescribed.

Abstract

An abstract is a short (Generally 100- 200) words, slandered summary of your research work. It provides a ‘’shop window” that readers can use to help them to decide whether or not your research is worth reading. You need to answer the following thing s in your abstract

What is the background of your topic and why it is important?

What do you investigate and what problem were you trying to solve? What are your methodologies, and implications of your discoveries?

CO-PO MATRIX

1 Organization of the Thesis/ Dissertation/ Report

This thesis shall be presented in several chapters, starting with Introduction and ending with Summary and Conclusions. Each of the other chapters will have a precise title reflecting the contents of the chapter. A chapter can be subdivided into sections, subsections, and sub-sub-section so as to present the content discretely and with due emphasis

1.1 Introduction

The title of Chapter 1 shall be Introduction. It shall justify and highlight the problem posed, define the topic and explain the aim and scope of the work presented in the thesis. It may also highlight the significant contributions from the investigation. It shall highlight the importance of the investigation and also define the topic and scope of the work envisaged.

1.2 Review of Literature

This shall normally form Chapter 2 and shall present a critical appraisal of the previous work published in the literature pertaining to the topic of the investigation. The extent and emphasis on this chapter shall depend on the nature of the investigation. The work which is expected to be carried out in the light above review should be the end paragraph of this chapter.

1.2.1 Patent Search

Literature search shall also include patent search of related topic.

1.3 Work done :(Report on the present investigation)

The work carried out shall be presented in one or more chapters depending on the nature of the investigation. Due importance shall be given to experimental setups, procedures adopted, techniques developed, methodologies developed and adopted. Each chapter shall have suitable title. Each chapter must have several sections and subsections with suitable sub-titles. These chapters shall be presented important and short derivations and representative data in the tables and figures. Information such as lengthy derivations. Voluminous tables and large numbers of figures shall be presented in the appendix.

The figures shall be drawn by drafting software or by draftsman with stenciled text. Free hand text will not be permitted. Xerox of Figures, graphs, tables, photographs from any reference is not permitted. Each figure or table may follow its first mention and not proceed. All figures, tables, graphs shall be titled. Title of table with table number should appear at the top and for the rest at the bottom with figure number.

Mathematical portion should preferably be typed. Where it is not possible, ample space shall be left and equations and symbols shall be inserted in permanent black ink.

1.4 Results and Discussions

This shall form the penultimate chapter of the thesis and shall include a thorough evaluation of the investigation carried out and bring out the contributions from the study. The discussion shall logically lead to inferences and conclusions as well as scope for possible further future work.

1.5 Summary and Conclusions

This will be the final chapter of the thesis. A brief report of the work carried out shall form the first part of the Chapter. Conclusions derived from the logical analysis presented in the Results and Discussions. Chapter shall be presented and clearly enumerated; each point Stated separately. Scope for future work should be stated lucidly in the last part of the chapter.

The future scope statement is a useful tool for future decision making when new change requests are considered to modify the project work. It also defines boundaries of project and clarifies what deliverables are in and out of scope.

Future scope is the part of future planning that involves determining and documenting a list of specific goals.

1.6 Appendix

Detailed information, lengthy derivations, raw experimental observations

etc. are to be presented in the separate appendices, which shall be numbered in Roman Capitals (e.g., “Appendix IV”). Since reference can be drawn to published/ unpublished literature in the appendices these should precede the “Literature Cited” section.

1.7 Literature cited:

'Literature cited' shall follow the last chapter and it shall give the list works (papers, books etc) referred to in the body of the text and shall be arranged in the order they are first cited in the text. The numbering shall be Arabic numerals indicated in [ ] brackets along with the author names in text. (Sander [5] has used elliptical sprockets for _ _ _ _ _ _ _ _ _ _ _ _ _ _ _).

For any paper, information shall contain the name of the authors, the title of the paper, the name of the journal, the volume number underscored, the page number and year of publication in parenthesis, in case of reference from journal or books in languages other than English, the title of the journal or book should be transliterated in Latin script and not translated. For any book the information shall contain the names of authors, the title of the book, and the name of publisher, the edition, and the year of publication in parenthesis. For papers and books with joint authorship, the names of all the authors, shall be reproduced in the same order, the author's name should begin with the last name followed by the initials. For example,

Paper:

Khedkar S.S., ; 'Newly Developed Automatic Lay-Up Process for Manufacturing of FRP Sheets', journal of Computational Engineering Research ,Volume-03, (2013), ISSN:2250-3005.

Book:

Hashem Akbari, "A review of methods for the manufacturing of residential roofing surfaces", Lawrance Berkeley, (2003).

The text of the thesis should positively indicate the numbers given to the paper or book in the list of references, wherever they are referred to.

1.7.1 Publications by the candidate

Articles, technical notes etc. on the topic of the thesis published by the candidate may be separately listed after the literature cited. This may also be included in the contents. The Candidates may also include reprints of his/her publications after the literature citation.

1.8 Acknowledgements

The acknowledgements shall indicate the extent to which assistance has been received from the various sources by the candidate in his work.

GENERAL INSTRUCTIONS

- **Draft copy:**
  The draft copy of the report should be given for correction (if any) to each of the guides and after it is approved the final print outs and bindings to be done.
- **Cover Page color:** Norms may differ.
- **List of tables:**
  It shall indicate both the table number, table title and corresponding page number. The table number should be in decimal notation indicating the chapter number and table number in that chapter e.g.2.11 refers to table 11 in chapter 2. Any reference in the text should be given as by quoting the relevant Para's such as "Table 2.11".
- **List of Figures:**
  It shall indicate both the Figure number, Figure title and corresponding page number. The Figure number should be in decimal notation indicating the chapter number and Figure number in that chapter e.g.4.6 refers to Figure 6 in chapter 4. Any reference in the text should be given as by quoting the relevant Para's such as "Fig 4.6".
- **Nomenclature:**
  It should contain the list of the symbols used. They shall be arranged alphabetically in the order of Latin letters, Greek letters and letters superscripts. As far as possible the generally accepted symbols should be used. Symbols not available in software shall be written in permanent black ink.

- No matter should be written on the left side. All matter should be (including written matter, figures and photographs) on the right side. Photographs should be mounted on thick sheet, titled and inserted at appropriate place or all together as independent appendix.

- Use of italic and short forms should be avoided. If short form is to be used first a long form and then in bracket its short form should be given. (It is common to use Flexible Manufacturing Systems (FMS) under such…).
- Written matter should be in third person (use of I, We, You etc should be avoided) in present tense as far as possible.

GUIDELINES FOR PREPARATION OF MINI PROJECT REPORT

THESIS FORMAT

- **Quality:**
  The thesis shall be printed/Xeroxed on white bond paper, whiteness 95% or above, Weight 70 gram or more per square meter
- **Size:**
  The size of the paper shall be standard A 4; height 297 mm, width 210 mm.
- **Type Setting, Text Processing and Printing:**
  The text shall be printed employing LaserJet or Inkjet printer, the text having been processed using a standard text processor. The standard font shall be Times New Roman of 12 pts with 1.5 line spacing.

FEATURES

- The final copy of the project report shall contain all the modifications/corrections suggested by the guide.
- The project report shall include the *certificate of approval* to be signed by Guide

PROJECT REPORT SIZE

- **FOR MINI-PROJECT**: The MINIMUM number of pages of the MINI-project report should be 40. The maximum number of pages of the MINI-project report should be 100.

PAPER QUALITY

- The copy of the project report to be submitted to the Departmental Library should be durable. To achieve durability, ideally, paper used in the project report should be acid-neutral or acid-free (as designated on the package) so that it does not turn brown over time. In the absence of this quality of paper, the paper must weigh at least 85 GSM (grams per square meter).

PAPER SIZE

- The standard size of paper of a project report is A4.
- Oversized figures and tables, if any, should be reduced to fit with the size of the project report but the reduction should not be so drastic as to impair clarity of their contents. One may also fold these pages to fit with the project report size.

SINGLE-SIDED PRINTING

- It is suggested that the project report be printed on one side of the paper.

NON-PAPER MATERIAL

- Digital materials, such as CDs and DVDs, may be included in the project report. They must be given in a closed pocket in the inside of the back cover page of the project report.
- All non-paper materials, as above, must have a label each indicating the name of the student and the date of submission.

PAGE NUMBERING

- Page numbers for the prefacing materials of the project report shall be in small Roman numerals and should be centered at the bottom of the pages.
- Page numbers for the body of the project report should be in Arabic numerals and should be centered at the bottom of the pages. The pagination should start with the first page of Chapter 1 and should continue throughout the text (including tables, figures, and appendices)

BINDING

- The final copies of the project report submitted for examination shall be ***SOFT BOUND FOR MINI PROJECT***.

FORMAT FOR THE PROJECT REPORT

After the text of the project report is written, it is to be formatted in an appropriate manner for printing. The following guidelines are provided to format the project report for easy readability.

FONT

- The preferred font size of the text in the project report is 12 point. The minimum font size of materials within a table or a figure can be 8 point, however.
- The preferred font type is Times New Roman.

MARGINS

- A margin of 3.75 cm (1½ inch) is to be given on the binding edge while on the other sides it is to be 2.5 cm (1 inch). The text of the project report, including headings, figures, tables, and notes, but excluding page numbers, must be accommodated within the page area.

LINE SPACING

- The line spacing in the main text must be 1.5 lines. single lines spacing should be given for quotations, abstract, declaration, project report approval, figure captions, table titles, figure legends, footnotes, and references.
- Equations, tables, figures, and quotations should be set off from the main text with adequate space (not less than the normal line spacing adopted for the main text).
- Two consecutive paragraphs should be separated by a spacing which must be larger than the line spacing adopted for the text.

DECLARATION

I / we certify that

a. The work contained in this project has been done by me under the guidance of my supervisor(s).
b. The work has not been submitted to any other Institute for any degree or diploma.
c. I have followed the guidelines provided by the Institute in preparing the project report.
d. I have conformed to the norms and guidelines given in the Ethical Code of Conduct of the Institute.
e. Whenever I have used materials (data, theoretical analysis, figures, and text) from other sources, I have given due credit to them by citing them in the text of the report and giving their details in the references. Further, I have taken permission from the copyright owners of the sources, whenever necessary.
